

Econ 201b–Second Half–Spring 2010

List of Theorems for the Final Exam

Typo Corrected, see **

You are responsible for the statements of all theorems stated in the text or in class. In addition, you will be either be asked to give all or a part of the proof of *one* of the following theorems, or to do computation(s) that require understanding the proofs of one or more of the following theorems:

1. Second Welfare Theorem, Exchange Case (Lecture 6)
2. Debreu-Gale-Kuhn-Nikaido Lemma (Lecture 8)
3. Debreu's Theorem on Generic Determinacy of Equilibrium (Corollary 4 in Lecture 10***) 
4. Every Walrasian Allocation Lies in the Core (Theorem 3, Lecture 12)
5. The first two bullets in the proof of Theorem 4, Lecture 12

Please make sure you work from the revised version of the Lecture Notes posted after the lecture.
